

Simon Ingemann Axelsen

M.Sc. Medialogy · HCI · Applied Research

☎ +45 51 21 27 47 ✉ SimonAxelsen@outlook.dk 🔗 LinkedIn 🐙 GitHub 🌐 Portfolio

M.Sc. student combining rigorous experimental research in user studies, statistical analysis with technical implementation to build evidence-based interactive systems. Experienced in full project lifecycle from concept to deployed prototype.

Technical Skills

Development: Unity (C#), Python, JavaScript, Git
AI/ML: LLMs, AI Agents, PyTorch, Reinforcement Learning, NLP (Transformers)
Research: User Testing, Experimental Design, Statistical Analysis
Certifications: Google 5-Day AI Agents Intensive (Kaggle), IBM AI Fundamentals, Hugging Face Deep RL

Selected Projects

Lost Translation — Adaptive Language Learning Game *Unity, C#, Experimental Design*
Aalborg University Copenhagen Sep – Dec 2023

- Designed serious game for **implicit Portuguese vocabulary acquisition** using adaptive difficulty algorithms and contextual narrative scaffolding
- Conducted quasi-experimental study (**n=33**): game-based approach achieved comparable retention to traditional methods with higher engagement and lower mental fatigue
- **Outcome:** Validated pedagogical viability of narrative-driven implicit learning; Bachelor thesis with statistical analysis

Conversational Voice Agent — Local LLM Integration *Unity, LLM*
Aalborg University Copenhagen 2024

- Built AI-driven dialogue system with **real-time voice synthesis** and local LLM integration using Ollama for offline inference
- Implemented natural voice interaction pipeline combining speech recognition, LLM reasoning, and text-to-speech response generation
- **Outcome:** Functional prototype demonstrating low-latency conversational AI without cloud dependencies; explores privacy-preserving voice interfaces

Et lille problem — VR Conflict Management Training *Unity, C#, VR, UX Research*
AAU Copenhagen & University College Copenhagen Jan – Jun 2024

- Developed branching narrative VR simulation for pre-service teacher conflict resolution training using Gestalt perception principles
- Led mixed-methods evaluation (**n=15**): achieved 4.2/5 immersion score; thematic analysis of interviews informed design iterations
- **Outcome:** Validated training tool presented to academic and institutional stakeholders

Movie Sentiment & Genre Analyzer *Python, NLP*
Hugging Face Space 2024

- Deployed NLP pipeline for movie review sentiment classification and genre detection using transformer-based models
- Built interactive web interface with Gradio; publicly accessible demonstration of production ML deployment

Education

M.Sc. in Medialogy

Aalborg University Copenhagen

Expected 2027
Sep 2025 – Present

B.Sc. in Medialogy

Aalborg University Copenhagen

Graduated Jun 2025
2021 – 2025

Relevant Coursework: Problem-Based Learning (PBL), UX Research, Machine Learning, Statistical Analysis

H.C. Ørsted Gymnasiet, Lyngby — Mathematics A, Programming B

Graduated Jun 2021

Experience

Kitchen Operations & Training Specialist

McDonald's, Copenhagen

workflows

Aug 2021 – Aug 2022
Part-time during studies; developed training protocols and operational
